AUGUST

Language and Literacy

Repetition is a part of learning! When rereading favorite books, try using different voices for different characters. Or, record you and your child retelling favorite stories in your own words. For more ways to build your child's knowledge, reasoning, and early literacy skills, visit [The Basics: Read and Discuss Stories](#).

Physical Well-Being and Motor Development

How do children learn to explore? [The Basics: Explore Through Movement and Play](#) gives parents examples of activities that “encourage curiosity, discovery, and a healthy body.”

Social Foundations

Young children can learn how to do simple self-help activities- they just need to be taught what to do. To see what you should expect from your young child and learn some tips, go to [“Teaching Your Child To: Become Independent with Daily Routine.”](#) from the National Center for Pyramid Model Innovations (NCPMI).

Mathematics

[Khan Academy](#) is a website that provides instructional videos for families to learn early math skills, such as counting and comparing numbers. Your child can also practice the skills taught in the video with fun games and activities.
