## You're invited to pair with local high school students and learn how to make technology work for you!

For this project, we'll be teaching you how to use Fujitsu scanners to preserve memories. Then you and your high school buddy will create a "Digital Scrapbook" that you can share with family and friends.

### All you need to do is:

- Sign Up on Site in Advance
- Choose a theme that means a lot to you
- Gather relevant documents, photos, records and other items (can even be 3-dimensional!)
- Bring the items and their stories to 30<sup>th</sup> St. Senior Center on October 21
- Spend a day making new friends, learning about technology and preserving memories to share with family and friends

### Here are some theme suggestions to get you started:

**"Our Family Recipes"** – handwritten recipes passed down through generations, heirloom cooking tools (an egg beater, for example), photos from family meals and gatherings

**"The Home Country"** – immigration documents, travel records, photos of the homestead

**"Remembering My Mother/Father"** – handwritten notes and cards, birth certificate, photos, favorite recipes, special trinkets/pieces of jewelry, medals/decorations, certificates of achievement

**"Dear Diary"** – handwritten letters, personal journals, post cards

## Plan to Bring This Event to Your Community
