

Information about accessing information and vaccines (1/31/2021)

San Francisco is currently vaccinating people in order of priority based on the state's vaccination plan. Visit covid19.ca.gov/vaccines/#California's-vaccination-plan to find out more about the plan. While supplies are expected to increase, they are currently still limited. It will take some time to get everyone vaccinated. This will be an exercise in patience!

VACCINATION UPDATES AND ELIGIBILITY NOTIFICATION: For the latest updates and to sign up to be notified when you're eligible for the COVID-19 vaccine on the vaccine priority list, visit sf.gov/covid-19-vaccine-san-francisco.

CHECK WITH YOUR HEALTHCARE PROVIDER: Each provider has their own procedures for signing up patients for vaccinations. At this point, we are still officially at Tier 1A, but the state has also opened this up to people 65+. All vaccinations are still by appointment.

KAISER: Visit mydoctor.kaiserpermanente.org/covid-19/covid-19-vaccine. If you're 65 or older, you may also be able to schedule an appointment by calling 415-833-2200.

CPMC/SUTTER: If you're in the current vaccination tier, schedule an appointment by phone at 844-987-6115 or at www.sutterhealth.org/for-patients/health-alerts/covid-19-vaccine.

SAN FRANCISCO HEALTH NETWORK is notifying patients by phone, text, or MyChart when it is their turn to get the vaccine based on categories set by state and federal guidelines. See sfhealthnetwork.org/covid-19-vaccine for more information.

UCSF: Patients and employees age 75 and over can schedule appointments through MyChart portal (www.ucsfhealth.org/mychart). Visit [coronavirus.ucsf.edu/vaccines for info](https://coronavirus.ucsf.edu/vaccines-for-info).
