I DID IT BECAUSE

Initially I DID IT because I really missed socializing with friends and family. Despite my best efforts at hand sanitation and mask wearing, I always felt there was a risk for exposure, to get sick or to pass it on to someone I loved. Although I know nothing is perfect, the vaccine gave me an added level of comfort to spend time indoors with my parents (who are in their 80's) and friends who were immunocompromised.

After my son, who is not eligible to be vaccinated, came down with COVID due to a summer camp outbreak, I am very glad I DID IT, because both my husband and I were able to stay healthy and fully care for him, while he recovered.
