I DID IT BECAUSE

Initially I didn't give much thought to getting the vaccine. I hardly ever get sick, and as of today, I have been very lucky not to have caught COVID-19. As time passed and more complete information was provided by the CDC, I realized how important it is to get vaccinated. Getting vaccinated allowed me to do some of my favorite activities again, just like before the pandemic.

I have three reasons that made me decide to get the vaccine. First, my family and coworkers all got the vaccine. Second, I love to travel and couldn't do that unless I got vaccinated. The CDC recommends a person to be fully vaccinated before traveling. And finally, FIU encouraged us and provided us the flexibility to receive the vaccine here on campus.
