I DID IT BECAUSE

I did it because I wanted to protect myself and my family. My health is super important to me and I need to make sure I am around to be a part of my family and to take care of my son. I've had too many people around me not believe in the vaccine and, sadly, are no longer with us or are currently in the ICU. I didn't even question getting the vaccine, and was first in line, because the science is sound and true. It is my social responsibility to do whatever I can to help bring an end to this pandemic and the known way to do it is to vaccinate, social distance, mask up, and practice good hygiene.
