

Baystate Health CEO visits PICU

The Pediatric Intensive Care Unit (PICU) was delighted to welcome **Dr. Mark A. Keroack** MD, MPH, President & CEO of Baystate Health to their unit on March 31, 2022. He joined the clinical team including intensivist **Dr. Kim Marohn**, residents, nurses and other staff on rounds. Dr. Keroack posted "I was privileged today to join the PICU team, led by Dr. Kim Marohn, in their multidisciplinary bedside rounds. The primary case presentation was done by nurse Ashley Brooks. Also, in attendance were pediatric and emergency medicine residents and the Pharm. D to oversee medication management. Respiratory therapists routinely join in as well. Most importantly, both the patient and her mom listened in and contributed. It is a great model to advance both safety and

patient centeredness!" Thank you Dr. Keroack for visiting and for your ongoing encouragement and engagement!
