

BECOME A CITIZEN SCIENTIST!

FROG WATCH USA™

Frogs play an important role in food webs and benefit humans by eating insects that can be pests and transmit disease. Due to their sensitivity to the environment, frogs act as indicators of an ecosystem's health. Many populations of frogs have experienced dramatic declines in the United States and around the world. As a citizen scientist, you can be directly involved in gathering information that can aid in the conservation of these species.

Training Dates

Part 1-Tuesday March 15th, 6pm-8pm

Part 2-Thursday March 17th, 6pm-8pm

Participants must attend both training sessions

ASSOCIATION OF ZOOS & AQUARIUMS

What is FrogWatch?

FrogWatch USA is a citizen science program of the Association of Zoos and Aquariums (AZA) that offers individuals an opportunity to learn about the wetlands in their community, to identify local frog and toad calls and to report data.

www.frogwatch.org

Frogs need your help!

You should participate if you have:

- An interest in learning about frogs and toads
- The commitment to learn and identify frog calls
- The ability to regularly visit a local wetland for data collection from February-August

Training Course

Hosted at

Miller Park Zoo
1020 S Morris Ave
Bloomington, IL 61701
