

## We want to hear from you!

Please complete a survey for the Highland Park Transit Study to help improve transportation options within and around Highland Park.

### What is the Highland Park Transit Study?

The City of Highland Park is conducting a comprehensive assessment of public transportation options. We are coordinating with our transportation partner agencies, including Moraine Township, Pace, and Ride Lake County.

Our goal is to review current available options and identify gaps in services that we can work to improve. Hearing from the community is crucial! This summer we will be seeking public feedback and ideas to improve local transportation options.

### What is this Public Survey?

We want to understand how those who live, work, and play in Highland Park use public transportation today or could use it in the future. The survey asks 14 questions and will take approximately 10 minutes to complete.

Thank you for this valuable feedback. We look forward to continuing to improve transportation options for everyone throughout the City! Please contact the project team at [transitstudy@cityhpil.com](mailto:transitstudy@cityhpil.com) with any comments or questions.

### TAKE THE SURVEY TODAY!
