

NOISE- INDUCED

HEARING LOSS

DID YOU KNOW?

This type of hearing loss:

- Is the only type of hearing loss that is completely preventable.
- Is caused by damage to the inner ear's hair cells which normally convert sound into signals the brain understands.
- Can happen at any age and is potentially permanent.
- In the workplace, most frequently affects those in automotive repair, manufacturing, construction, transportation and agriculture.

***Especially in noisy environments,
hearing conservation matters.***

Schedule your complimentary screening – the sooner the better.
