

10 Tips to Successful Hearing Aid **CARE AND USE**

- 1 Remove your hearing aids at night.
- 2 Place devices on charger nightly, making sure both lights activate to indicate charging.
- 3 Nightly, use a clean, dry tissue to gently wipe the outer part of hearing aids, especially bottom section contacts.

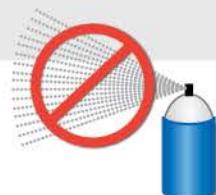

Place devices on charger nightly, making sure both lights activate to indicate charging.

3 Nightly, use a clean, dry tissue to gently wipe the outer part of hearing aids, especially bottom section contacts.

Keep hearing aids away from extreme heat and cold.

5 Do not wear hearing aids while applying makeup or hair products.

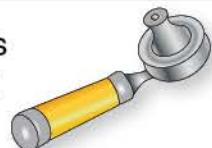

Keep hearing aids and batteries away from children and pets.

7 Use your charger in a dry place, not near shower or water.

Daily, remove your hearing aids from charger and clean as instructed before putting them on.

9 Please schedule a checkup appointment every 4 months. We will inspect your ears for wax, as well as professionally clean and check your hearing aids to ensure that you continue to receive the full benefits from your devices.

Get in the healthy habit of daily hearing aid use and enjoy life to the fullest.
