GIVE BUPE
SAVE LIVES

Photograph by @CooperEMed

Given the recent release of the U.S. Department of Health & Human Services (HHS) new practice guidelines regarding buprenorphine Tx for opioid use disorder, we updated the original training.
The course content now reviews all information needed to prescribe buprenorphine in an ED, & faculty will walk attendees through the SAMHSA waiver application & submission process.
The updated duration is now 120 minutes.
Anyone in the U.S. may attend & free CME will be provided through RowanSOM.
