

## RALCO GRUEL FEEDER PROGRAM

Assisting fall-behind pigs is a perpetual challenge. By focusing on getting and keeping fall-behind pigs hydrated and on feed, you'll achieve more uniform, full-value pigs.

Ralco's Gruel Feeder Program of innovative products is delivered through a gruel feeder and helps get fall-behind pigs on feed quicker and maintain performance, ensuring every pig counts.

### **Birthright™**

BABY PIG MILK REPLACER

Nutrition for fall-behind pigs that bridges the gap from milk to feed and promotes gut health.

### **TACTICAL START™**

NURSERY NUTRITION

Highly digestible and palatable nursery nutrition that eases the stressful transition to dry feed.

### **DE-LYTE™**

Water additive containing vitamins D & E, electrolytes and a prebiotic that gets pigs drinking, eating and boosts immunity.

#### GRUEL FEEDER PROGRAM BENEFITS:

- Promotes hydration
- Promotes feed intake immediately after weaning
- Promotes gut health and reduces pathogen load
- Highly digestible proteins promote efficient gain
- Promotes immune function
- Maximize profitability by offering a complete program improving piglet performance
- No Veterinary Feed Directive (VFD) required

#### Directions for Success:

1. Fill tank with **DE-LYTE™** and water. Mix 1 oz. of **DE-LYTE™** to 5 gallons of water
2. Spread small layer of **Birthright™ Bridge** on both sides of trough
3. As pigs come on feed:
  - a. Gradually add **Tactical Start™** pre-starter pellets and eventually nursery meal
  - b. Sprinkle **Birthright™ Bridge** over nursery feed a minimum of twice daily to enhance intake
4. It's vital to graduate recovered pigs off the **Gruel-O-Matic Rescue Feeder by HavWin** into a recovery pen

**NO VFD  
REQUIRED**

*Two feeder sizes available (25-30 head and 50-60 head). Feeder is not intended to be only source of feed and water.*
