BEAT THE PEAK

Conditions are favorable these next few days for peak energy use.

Set your thermostat 2-3 degrees higher, but keep your system fan running.

Turn off and unplug non-essential lights and electronics.

Avoid using large appliances, like ovens and washing machines.

Keep curtains closed on the east, south, and west sides of the house during the day.

Reset the fridge temperature to 35-38F and the freezer to 0-5F.

Lower your electric water heater temperature to 120F.
