

How Americans Use Electricity

The latest data from the U.S. Energy Information Administration shows the combined use of clothes washers and dryers, computers, dishwashers, small appliances and other electrical equipment (noted as “all other uses” below) accounts for nearly 40% of electricity consumption in American homes.

Source: EIA, Annual Energy Outlook 2020

¹Includes consumption for heat and operating furnace fans and boiler pumps.

²Includes miscellaneous appliances, clothes washers and dryers, computers and related equipment, stoves, dishwashers, heating elements, and motors.
