

**University of New Mexico**  
**Division Chief Pediatric Endocrinology**  
**Participate in a Growing an Established Program**  
**Opportunity to Pursue Scholarly Activity Interest**

Merritt Hawkins academic recruiting division has partnered The University of New Mexico Health Sciences Center, affiliated with the Children's Hospital of New Mexico, to invite you to consider a Division Chief Pediatric Endocrinology opportunity that provides a unique balance of practice fulfillment, quality of life, and the opportunity to pursue sub-specialty interests. We are seeking an experienced clinician in Pediatric Endocrinology at the Associate or Professor Level to serve as Division Chief of Pediatric Endocrinology and Diabetes. Successful candidates should have experience with inpatient and outpatient care of a broad spectrum of childhood endocrine disorders. This leadership position includes opportunities for research and teaching at a dynamic well-supported academic medical center. Applicants with a particular interest in diabetes in an ethnically diverse population of the Southwest are urged to apply. Salary and track will be commensurate with training and experience.

This Position Offers:

- Opportunity to lead, grow, and develop an academic team in clinical and academic efforts
- Further develop and participate in your subspecialty service area of expertise
- A diverse patient population and service providing care to children with complex cases
- Opportunity to participate in the further development of specialty services including, but not limited to, thyroid disorders, genetic disorders, disorders of sex development, and polycystic ovarian syndrome
- Research, community advocacy, education, and expansion of an already thriving clinical program
- Medical education, teaching medical students and pediatric residents

Minimum Qualifications:

- Able to obtain state licensure(s) in the state of New Mexico
- BC in Pediatric Endocrinology
- Six years clinical experience
- Must be authorized to work in the U.S.

Preferred Qualifications:

- Experience with inpatient and outpatient care of a broad spectrum of childhood endocrine disorders and patient education
- Experience with state-wide outreach programs
- Evidence for leadership roles in academic medicine
- Experience mentoring of junior faculty
- Experience with professional and patient education, teaching and research

The University of New Mexico's Children's Hospital operates in a state of the art facility that provides the most advanced pediatric medical care available in New Mexico. It is the only Children's Hospital in the State, it has the only level I trauma designation, and it coordinates and runs the only ECMO program in the State. UNM Health Sciences Center has an NIH-funded Clinical and Translational Science Center with a long-standing pediatric component, is a nationally recognized leader in medical education and a major center for health care and research. In addition, UNM is one of the sites in IDeA State Pediatric clinical Trial Networks and it collaborates closely with the Environmental influences on Child Health Outcomes program, an NIH initiative to advance child health and development in multiple areas including pre-, peri-, and postnatal outcomes and neurodevelopment. New Mexico is the *Land of Enchantment*, offering a rich diversity of arts, history and cultures.
