

**Chief, Division of Nuclear Medicine  
Department of Radiology**

University Hospitals invites applications for an exceptional opportunity to lead as the Division Chief of Nuclear Medicine. This pivotal role offers a unique platform to drive innovation in theranostics and nuclear medicine at one of the nation's most respected academic medical centers and community hospital networks. Reporting to Donna Plecha, MD, Chair of the Department of Radiology, the Division Chief will set the strategic vision for a Division recognized as the largest nuclear medicine program in Ohio, with a system-wide clinical footprint and a robust portfolio of over 85 clinical trials. With a deep connection to the UH Seidman Cancer Center and the NCI-designated Case Comprehensive Cancer Center, the Division is a leader in advancing imaging technologies and therapeutic applications that define the future of nuclear medicine.

The Division Chief will champion transformative initiatives in clinical care, research, and education, enhancing the Division's national and international stature. This includes fostering groundbreaking collaborations with pharmaceutical and industry partners, driving interdisciplinary research, and advocating for state-of-the-art infrastructure. By cultivating a culture of clinical excellence, the Chief will integrate innovative theranostic therapies and nuclear medicine practices into patient care, ensuring the Division remains at the forefront of cutting-edge advancements.

Education is central to this role, with the Division Chief overseeing comprehensive training programs and collaborating with Case Western Reserve University to inspire and prepare the next generation of nuclear medicine specialists. This leader will streamline operations across the healthcare system, addressing challenges and ensuring the Division operates with innovation, growth, and operational excellence.

This is a rare opportunity for a visionary leader to shape the future of nuclear medicine in a dynamic academic health system dedicated to advancing healthcare through innovation, collaboration, and community impact. Ideal candidates are bold, forward-thinking individuals ready to elevate the Division's profile, champion groundbreaking therapies, and contribute to the mission of University Hospitals.
