The University Hospital of Columbia and Cornell

### **Chief, Division of Adult Cardiothoracic Anesthesiology**

**Columbia University College of Physicians and Surgeons  
NewYork-Presbyterian/Columbia University Medical Center**

Columbia University College of Physicians and Surgeons invites applications and nominations for the position of *Chief, Division of Adult Cardiothoracic Anesthesiology*.

The Division of Adult Cardiothoracic Anesthesiology of the Columbia College of Physicians and Surgeons is by any measure among the premier anesthesia divisions of its specialty in the region and in the world. The division's strong conviction to provide superb patient care, education, research, and faculty development has made it among the best training programs of the specialty. Its service to the clinical mission of the Columbia University Medical Center is a critical element in the hospital's #5 *U.S. News and World Report* ranking among hospitals in the nation.

The next Chief will be an outstanding academic physician accomplished in the areas of clinical care, resident/fellow education and research. They will ensure the highest standard of clinical and educational excellence, provide mentorship, support, and encourage the scholarly activities of the division's faculty and fellows and maintain the current exceptional level of clinical care and collegial interactions with surgeons, cardiologists and perfusionists. This leadership position is supported by extensive departmental educational support, including a state-of-the-art simulation center and administrative support.

The next Chief will play an important role in ensuring clinical research continues to thrive within the division. They will work to identify opportunities to uniquely broaden its record of achievement. This includes the development of clinical trials, NIH grants, and/or translational research – all critical to the academic future of the division as well as the department itself. Significant start-up funds are available to support pilot projects and the growth of a successful research program. A critical role for the Chief is to mentor faculty and fellows as they develop their research careers. In addition, they will work closely with other clinical and basic science department chiefs within the College of Physicians and Surgeons to advance the mission of the school. They will also have the opportunity to recruit new members to the ACTA faculty and fellowship and foster a scholarly environment. The department commitment to scholarly activity is reflected in extensive programs in clinical and basic research, an accredited ACTA fellowship, and protected research time for qualified individuals.
