

# Ellison Medical Institute

**Ellison Medical Institute** invites applications from qualified physicians for the position of **Director of Preventative Medicine**.

Ellison Medical Institute is seeking a dynamic and dedicated physician to join their esteemed team. This role offers a unique opportunity to blend clinical excellence with innovation and technology development. The Director will lead the creation and implementation of high-impact and forward-thinking patient care protocols focused on risk assessment and prevention, build meaningful relationships with patients and contribute to shaping the strategic direction of the clinic and preventative health program as part of a collaborative team.

The Director of Preventative Medicine will play a pivotal role in leading clinical initiatives to establish best practice for preventative health and cancer survivorship. This position combines leadership in clinical operations with a strong emphasis on advancing the current standard of care through evaluation and implementation of novel technologies and diagnostics.

## **About Ellison Medical Institute:**

The Ellison Medical Institute strives to spark innovation, leverage technology, and drive interdisciplinary, patient-centered research to continually enhance health, reimagine and redefine cancer care, and transform lives.

Established in 2016 as a medical research and development center, the Institute features innovation labs for artificial intelligence and molecular analytics and was among the first organizations to vertically integrate the interdisciplinary study and treatment of disease. The Institute offers multifaceted programs, including a preventative medicine and cancer clinic, cross-disciplinary research laboratories, a health policy think-tank, and community outreach and educational programs.

## **Qualifications:**

Applicants must hold a medical degree from an accredited medical school, be eligible for a California medical license, and be board certified in Internal Medicine or Preventative Medicine.

Other desired qualifications are as follows:

- 3+ years in outpatient preventative health.
- Focus on high-risk patients, cancer prevention, cancer survivorship is a plus.
- In-depth understanding of clinical care, including disease prevention strategies, early detection methodologies, and patient-centered care approaches.
- Strong project management skills with the ability to oversee multiple initiatives, ensuring alignment with organizational goals and timelines.
- Excellent communication and collaboration skills to engage with diverse stakeholders, patients, and the community.
- Ability to translate research findings into practical applications for patient education and preventive care programs.

- Ellison Medical Institute's 10 Tenets: Demonstrates a dedication to the Institute's cultural principles by being collaborative and inclusive, while also taking creative risks to drive innovation. Values emotional intelligence and communicates with empathy and respect for others. Thrives in a team that is curious, feels a strong sense of responsibility, and possesses the grit to achieve excellence.
