

Chief Physician Executive, Oncology

Fort Myers, FL – Lee Health is seeking a transformative, dynamic operational physician leader to serve as the Chief Physician Executive, Oncology (CPE). This is an exceptional opportunity for a mission-driven physician executive to build and lead the oncology service line at a highly regarded and financially strong integrated delivery system focused on its commitment to improve the coordination of care, and empower and inspire healthier lifestyles. With net patient revenues of \$1.96 billion and total operating revenues of \$2.1 billion in 2020, Lee Health is a health system comprised of four acute care hospitals, two specialty hospitals, outpatient centers, walk-in medical centers, primary care, specialty physician practices and other services across the continuum of care.

With a total of 1,812 beds, Lee Health is the largest not-for-profit public health system in Florida. Lee Health remains the bedrock of the Southwest Florida community by offering acute care, emergency care, rehabilitative and diagnostic services, health and wellness education, and community outreach and advocacy programs throughout the five county region. Lee Health continues to invest back into the community to improve facilities, add services and extend care to those who need it most. In the 100 years since opening the first hospital, Lee Health's dedication to the community - the people with whom they live and work - have been at the core of its mission, values and strategic planning principles.

Reporting to the Chief Medical Officer of Population Health & Physician Services, the CPE will oversee all services within the cancer service line and will work in a dyad partnership with the Vice President of Oncology. They will be responsible for the growth and advancement of a highly integrated cancer program across Lee Health, while fostering a culture that is focused on clinical excellence and care innovation.

The CPE will lead the continued development of a highly functional, cohesive service line ensuring outstanding quality, leading-edge care, high value services, establishment of clinical standards and benchmarks, and engagement of physicians, as well as clinical and support staff. Lee Health will be known for operating destination oncology services, a focus on patient care and high quality as guiding principles. They will establish and lead the execution of a strategic plan for the expansion of services, clinical trials and fostering a spirit of innovation in care delivery and multidisciplinary and inter-institutional collaboration.

Leading a diverse team, the CPE will have accountability for all aspects of cancer care, including operational and financial performance. They will work collaboratively with administrative and financial leaders to establish appropriate budgets for staffing and delivering all components of the clinical and research programs.
