

GARLAND

TEXAS MADE HERE

1/8/2026

To Whom It May Concern:

The Garland Public Library System recently completed two major library construction projects, Garland's Central Library and the West Garland Library, both opening in 2025. Throughout the planning, furnishing, and installation process, Library Interiors of Texas proved to be an exceptional partner and an invaluable resource in delivering modern, functional, and welcoming public library spaces.

The Library Interiors team is highly responsive, knowledgeable, and easy to work with. Their communication was timely and consistent, and they approached each phase of our projects with professionalism, flexibility, and a solutions-focused mindset. Even when construction schedules shifted or complex issues arose, they worked collaboratively with our staff and project partners to keep progress moving and ensure needs were met.

Library Interiors of Texas also demonstrated a clear understanding of the complexities and evolving expectations of modern public libraries. Working with our Project Team, they provided hands-on assistance through the entire process: from packing and moving services, to storage, to installation of library materials and collections, furnishings, and shelving. Their experience in library environments was evident in both their design insight and their ability to align solutions with real-world library operations.

Based on our experience with two successful library construction projects, I highly recommend Library Interiors of Texas to any library system or organization seeking a trusted partner for renovations, furnishing, and interior planning. Their expertise, professionalism, and understanding of today's library needs make them an outstanding choice.

Sincerely,

Karen Archibald
