

Standard Response Protocol (SRP) and Standard Reunification Method (SRM) 1 Day Train-the-Trainer 8 hours

The SRP/SRM 1 Day Train-the-Trainer course introduces the concepts and history of the Standard Response Protocol and the Standard Reunification Method and how to educate students and staff in the programs and strategies to implement the programs. The SRP was introduced in 2009 and is a proven enhancement to school safety planning used by thousands of schools in the US and Canada. Later, in 2012, the SRM was introduced to fill a critical void in school safety planning – how to reunite students with their parents after a crisis. This training takes a deep dive into both programs and how to begin using them. A brief segment on Incident Command and how it relates to crisis management for educators is also included.

Enrollment is limited to Illinois based police, fire, EMS, EMA and educators (schools).
