

Tech Team report of 8/24/2025

The issue with viewing the Sunday service live stream has been resolved for the most part, there is still a problem with the audio having an "echo". Chris has reached out to Jacob Davis, from Salem UMC, who in the past has helped us out with the software settings. We will probably meet before this upcoming Ad Council meeting.

The sermon portion of the service is being recorded as a backup, in case there are problems with streaming.

One camera is having erratic operational issues, might need replacement, fortunately it is still under warranty. Will continue to monitor the irregular flickering of its video signal.

Respectfully submitted,
Ray Jauregui
