

# September is Alopecia Awareness Month

Dear Friends of Salon Nouveau,

This is a reminder that September is Alopecia Awareness Month. To most people, it doesn't mean much of anything. To the many men, women, and children challenged by Alopecia, September is a month of empowerment and a reminder those affected by Alopecia have the ability to deal with this affliction - not just live with it.

Alopecia, for those who don't know, is an autoimmune hair loss disease. There are a few different types of Alopecia. Alopecia areata is the most common, which causes patches of hair loss on the head or face. Alopecia areata is estimated to account for 70 percent of all reported Alopecia cases.

Everyone of every age, race, and gender can have Alopecia. This means children are affected; and unfortunately, it's not rare. It is actually common for Alopecia to onset in childhood. Since there is no cure, Alopecia is a lifelong challenge. At Salon Nouveau, our professional team has a long, successful history of solutions through Cyberhair replacements. Many of our clients have overcome the heartache of Alopecia, and have their confidence restored and their lifestyle more complete and fulfilled.

Call Salon Nouveau today for a free, private consultation.

Respectfully,

*Tracy Belleau*
