Footnotes and Legend to the Schedule of Businesses

TBS (To be suggested by Purchaser) - Seller, in his/her sole discretion, has the right to accept or reject all offers.

Down Payment - Down Payments are estimated and assuming purchaser qualifies for SBA financing in most cases.

SDE (Seller's Discretionary Earnings) - A calculation showing the cash flow generated by the business for the most recent tax year, unless otherwise indicated, by adding back to the net profit those costs that are discretionary to the Seller. These costs could include the owner's salary and benefits, interest paid on the Seller's notes/debts that are not assumed by the Purchaser, non-cash expenses, such as depreciation (in appropriate situations) and amortization, and certain non-recurring or unusual expenses.

Adjusted EBITDA (Adjusted Earnings Before Interest, Taxes, Depreciation, and Amortization) - A calculation showing the cash flow generated by the business for the most recent tax year, unless otherwise indicated, by adding back to the net operating profit interest paid on the Seller's notes/debts that are not assumed by the Purchaser, non-cash expenses, such as depreciation (in appropriate situations) and amortization. In addition, owner's salary and benefits over and above normal would also be added back.

EBITDA (Earnings Before Interest, Taxes, Depreciation, and Amortization) - A financial metric used by sophisticated financial buyers, such as Private Equity Groups. EBITDA often implies GAAP accounting.

Details of either the SDE, Adjusted EBITDA, or EBITDA calculations are available for review in each detailed presentation package.
