

Have you seen signs of Wolverine in the area?

A project on Wolverine denning habits in the Kootenays needs your help.

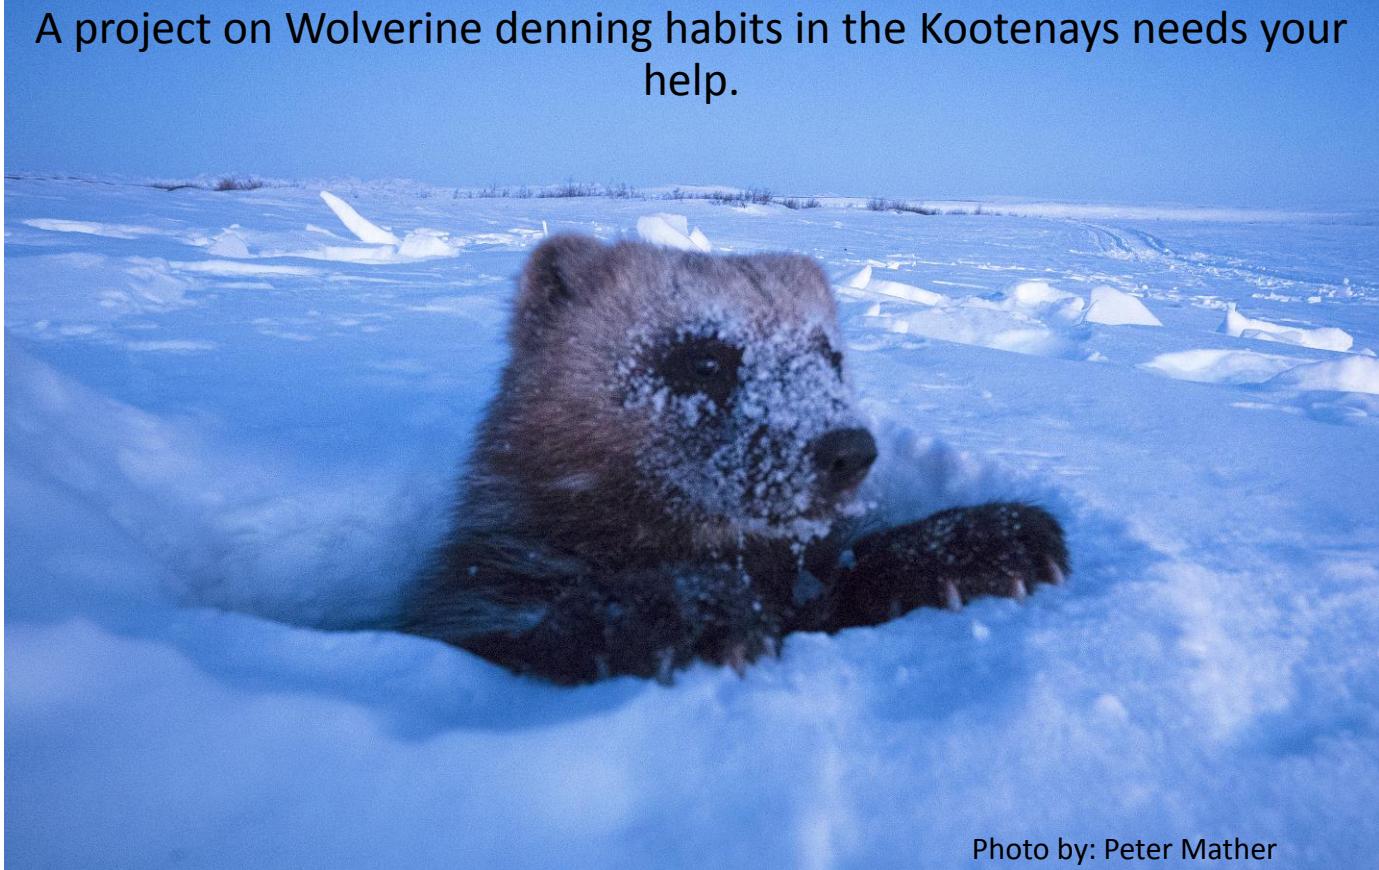

Photo by: Peter Mather

Dens:

- Holes in the ground with lots of tracks coming to and from

Tracks:

- 5 toes
- 8-10 cm across, 10-12 cm long
- 2x or 3x loping pattern

Report any Wolverine related observations: www.wolverinewatch.org

Wolverine are sensitive to human disturbance, please do not follow tracks. Note their location (as specific as possible) and direction of travel
