

Anova Energy Carbon Compliance and Sustainability Services

Anova Energy is committed to providing our clients with sustainable solutions to help them thrive in an ever-changing global marketplace. As a Canadian Chamber of Commerce member, we extend our services to other members seeking to meet their carbon emissions obligations under federal or provincial regulations, as Canada commits to promote sustainable economic growth.

As a leading Canadian energy consultancy and brokerage firm, Anova Energy ensures that the Carbon Offset plans we offer are suited to our client's goals and objectives. As part of our program offering, we will verify the offsets' validity, ensure they are made in Canada and in compliance with federal or provincial regulations.

On behalf of our clients, we directly negotiate and purchase discounted Renewable Energy Certificates (RECs), Carbon Offsets and Emission Performance Credits (EPCs). These purchases can also contribute to any other company targets such as building certification credits, green branding or simply environmental stewardship.

Anova Energy also offers services in electricity and natural gas procurement management, retail energy reviews, energy billing audits, energy consumption data analysis and any related consultation.

Learn more about Anova Energy by connecting with our dedicated Chamber of Commerce Renewable Energy Specialist, Siddha Mahajan Lavania at siddha.mahajan@anovaenergy.ca or via our website www.anovaenergy.ca.

Anova Energy works to build a Canada where businesses can thrive now and in the future!

Anova Energy Carbon Compliance and Sustainability Services

We at Anova Energy are committed to providing our clients with the sustainability solutions to help them thrive in an ever-changing global environment. With our membership of the Canadian Chamber of Commerce, we extend our services to your chamber (association) members seeking to voluntarily offset their carbon emissions or looking to build their Corporate Social Responsibility and Sustainability portfolio.

As a leading Canadian energy consultancy and brokerage firm, Anova ensures that the renewable energy plans we offer are suited to our client's goals and objectives. We will verify the offsets' validity and legitimacy, and that they comply with federal or provincial regulation.

On behalf of our clients, we directly negotiate and purchase discounted green electricity via Renewable Energy Certificates (RECs), and emission reduction via Carbon Offsets. These purchases can also contribute to any other company targets such as building certification credits, green branding or simply environmental stewardship.

Anova Energy also offers services in electricity and natural gas procurement management, retail energy reviews, energy billing audits, energy consumption data analysis and any related consultation.
