Peacock Tariff Consulting

Navigate Complex Trade with Confidence

Supporting Chambers with Clear, Practical Trade Expertise

In today's volatile global trade environment, the cost of misclassifications and missed opportunities adds up quickly, especially for small and medium-sized businesses without dedicated trade teams. Peacock Tariff Consulting brings 20+ years of customs compliance expertise to help importers optimize classifications, recover hidden savings, and build a strategy that holds up when policy shifts. We also offer training and webinars to help your team stay informed and compliant.

What We Do

Tariff & Commodity Review

We assess your products under the Harmonized System to confirm correct classifications, identify misclassifications, and uncover duty overpayments. The result is reduced risk, stronger audit readiness, and savings opportunities.

Regulatory Compliance Guidance

Customs regulations change frequently, and even small errors can lead to penalties or delays. We interpret complex requirements, advise on documentation, and help you build internal processes that keep your operations compliant and efficient.

Strategic Trade Planning

Trade strategy is a competitive advantage. We work with your team to evaluate sourcing options, assess tariff exposure, identify savings under trade agreements, and build supply chains resilient to regulatory and geopolitical shifts.

Tariff Mitigation

We identify and implement strategies to reduce your duty burden while maintaining full compliance. This includes tariff engineering, duty deferral, remission orders, drawback opportunities, and preferential trade agreement leverage to lower landed costs.

Trainings & Webinars for Businesses

Popular Topics

- Tariffs 101: how tariffs impact your costs
- Trade compliance essentials and what to know
- Identifying drawback and refund opportunities
- ACE portal & tariff optimization training

Trade rules change fast, and your team is better prepared when they understand them. We deliver practical, easy-to-follow trainings and webinars on tariffs and trade compliance, tailored to your business and your people.

Sessions can be delivered as private team trainings or group webinars, depending on what works best for your organization.

Ready to optimize your trade strategy?

Let's discuss how we can reduce your tariff costs, develop a strategic and compliant trade approach, and train your team to manage trade with confidence.
