

**Join the Connecticut Professional Timber Producers Association for an exciting opportunity to witness the fascinating journey from log to lumber! Don't miss out on this unique experience!**

Discover how to maximize the value of logs!

In this program, you'll witness the entire process of a tree-length log being bucked and graded, then sawed into lumber, along with insights on how that lumber is graded.

Additionally, we will provide industry updates at the federal, regional, and state levels. Along with an overview and Q&A of forestry and wetlands permits.

The day will conclude with the Connecticut Professional Timber Producers Association's Annual Meeting.

Connecticut Professional Timber  
Producers Association
