WHERE WE BEGAN AND WHERE WE ARE GOING!

AUGUST/SEPTEMBER

Planned our garden and strategies, cleaned out garden beds, purchased what we needed for the fall planting.

OCTOBER

Put seeds and seedlings in the ground, tended to them carefully, listened to some educational lectures for success.

NOVEMBER

For some, we will clip back our herbs and veggies and do some cooking. Continue to tend, add some new plants for crop rotation, and fertilize.

DECEMBER

More cooking and changing up some of our eating habits to include more fruits, vegetables and herbs for the holidays!

JANUARY

A nice harvest so far. Let's get creative. Some plants might have reached their maturity, it is a good time to put in new seeds/seedlings.

FEBRUARY - MAY

Infuse some oils and vinegars. Can or dry some of your bounty for the future. Get instructions on "How to Close Down Your Garden" in summer.
