

Supplemental Gardens of Hope Checklist

The Foundation will be visiting shortly. Here is a checklist of tasks you can do before we get there to involve students, staff, and families. The more they invest, the more they will truly own it. They will be amazed when they start eating their own food!

Students can make a physical or electronic garden journal to keep all year. Contest pending.

Take some of your garden space and start seeds to truly understand the plant cycle

Check the monthly toolkits we send and implement the educational lessons/projects

Create fundraisers to keep your garden "fun"ded for extras you may want

Share photos (get permission) of your club meetings with us

Get parents and other community leaders involved

Create a share drive for parents and students. We have lots of things to share all yearlong

Friend us on social media and tag us too; a picture is worth a thousand words

Please have the lesson folder we send you up on the whiteboard when we arrive
