

COVID-19 JOB-SITE SAFETY AWARENESS DAY

APRIL 16, 2020

Please join us in a unified, statewide COVID-19 job-site safety awareness day on **Thursday, April 16** to help educate our work crews about the critical role safety and health plays during this global crisis.

Follow these 3 steps to help flatten the curve and keep our job-sites and workers safe:

 **SHARE**

Share these links with your superintendents, project managers and safety directors:

- ✓ [Action Plan](#)
- ✓ [Essential Employee Letter](#)
- ✓ [Tool Box talk](#)

 **POST**

Post this [COVID-19 job-site safety poster](#) on all active job-sites.

 **WATCH**

Encourage all employees and subcontractors to watch this webinar: [COVID-19 Recommended Practices for Employers & Employees on Construction Jobsites.](#)

We have an obligation on our job-sites to ensure every individual understands the policies and procedures to keep us safe during the COVID-19 crisis. Construction industry partners and building officials support this effort.
