

Hello everyone,

The Whidbey Homeless Coalition (WHC) is currently conducting a comprehensive review of our facilities and expenditures with the goal of streamlining costs. We're carefully examining every aspect of our operations to identify opportunities for greater efficiency and fiscal responsibility.

We believe a **trash compactor** could significantly reduce our waste volume, lower our hauling costs, and improve our recycling efforts. This donation would have an immediate and lasting impact on our shelter's operations and sustainability.

If you or your organization would consider donating a trash compactor—or know someone who might—please contact me. Your support would help us direct more funds toward essential services and expand the care we provide.

With gratitude,

Bobbi Lornson
