

We Energies Youth Apprenticeships/Internships

Learn about paid career training

Explore careers in an industry that is always in demand—energy! At We Energies, work with a mentor and learn what it takes to become a line mechanic, design engineer, or gas technician. Spend time on site to gain skills and get hands-on experience in career pathways.

Line Mechanic Intern

- With a mentor, learn about electric distribution, basic electric theory, safety, and materials and operations. This paid internship can lead to full-time employment after high school.

Design Apprentice

- Work 900 paid hours and learn natural gas design and engineering. Design construction prints and see them implemented on job sites. Earn up to 12 college credits transferable to MATC.

Gas Technician Intern

- Work alongside technicians to understand how natural gas reaches and is used in homes and businesses. Learn to maintain equipment, repair leaks, and troubleshoot. Get paid while you train.
