## FEATURED PRODUCTS

## Casecracker Onyx Interview Room Recording System

The CaseCracker Onyx Interview Room Recording System is a secure, all-in-one evidentiary solution for recording, storing, and reviewing interviews and interrogations with high-quality video and audio. Designed for multiple industries including law enforcement and investigative use. Whether for a multi-site deployment, a small department, or use in the field, the Onyx system is built to support your interview recording needs at any scale.

- Start recording with one button – no training needed
- Access, review, and export interviews from any Windows PC
- Record multiple HD video and audio streams, fully time-synced
- Capture whispers and shouts with digital, high-clarity microphones
- Export files in standard formats – no special software required
- Built-in redundancy protects every recording automatically
- Instantly search, flag, and annotate critical moments
- Monitor and manage multiple rooms from any desktop
- Encrypted storage and evidence authentication built into every file

## Tioga Design Delta V EVO Handheld RF Wide Band Detector

The Delta V EVO is a compact handheld RF detector designed to quickly locate hidden transmitters, bugs, and unauthorized signals, with audio and visual alerts to guide you to the source.

- Audio Geiger type 'click'
- Visual LED display
- Frequency 10 MHz to 16 GHz
- Sensitivity Average -47 dBm
- Dynamic range - typically 45 dB 10 MHz to 16 GHz
- Rechargeable Lithium-Ion battery
- Size - 215mm x 57mm x 16mm / 8.46in x 2.24in x 0.63in (incl. antenna)
- Weight - 178g / 6.28 oz
- Detection Method Differential Electromagnetic Field measurement discriminating in favor of local transmitters

## Stateside Electronics M156 15" IP PoE Anti-Ambush Monitor

This rugged, compact monitor streams live camera feeds over a direct network connection, delivering real-time surveillance at critical entry and exit points – so you know what's waiting before you open a door or step outside.

- 15.6" Full HD screen – clear, sharp video with no downscaling
- Records video signal to external storage (optional)
- Ideal for perimeter monitoring, exit checks, and discreet surveillance operations
- Built-in network decoder – view up to 8 IP cameras directly without a PC
- Durable metal frame – rugged for guard stations, secure rooms, and warehouses
- Wall-mountable or desktop ready with VESA compatibility
- Supports PTZ (pan-tilt-zoom) camera control with password-protected access
- LED backlight – brighter image, lower power consumption
- TAA compliant for federal purchasing
