One of the most popular trends for floors and walls involves a play on pattern. Incorporate herringbone installs, contrasting grout colors, or texture for ultimate tile style.

For something unexpected, mix two or three colors of wood look planks together to create a dramatic look that will make your modern makeover one-of-a-kind.

Use tile in unconventional ways, two story tile fire places, 3D tile accent walls, and tile moving outdoors will be all the rage this year.

PATTERNPALOOZA

Taking a cue from home interiors, prints are available in tile now in designer encaustic looks.

"The color white is dominating the design scene and with good reason! White marble looks offer endless design possibilities with its style-neutral palette. From classic to modern design styles, this trend is definitely one of our current obsessions."
