Our PMU instructors have acquired both years of working on clients and years of instructing students to master skills for their future clients. All of our instructors are certified with required credentials to instruct. Our Academy has strategically hired instructors from diverse career backgrounds. These instructors have backgrounds from aesthetics such as cosmetologists and estheticians. In contrast we have instructors with science backgrounds in medical and epidemiology. The benefits of being taught by instructors with such a diverse background will allow students to be taught from different perspectives.

~ Queen Kay ~

Our comprehensive training will provide students with in-depth knowledge about some of the most recently trending procedures in aesthetics. This training provides 5 different optional classes for individuals to earn their certification. Our select training course will include : Ultrasonic Cavitation Training with certification, Vacuum Therapy Training with certification, Radio Frequency Training with certification, Bipolar Vacuum Training with certification and Laser Lipolysis with certification .

Our focus will not just be the technique but also: skin safety, proper sterilization and sanitation, the transmission of diseases, the anatomy of the body, health contraindications, how to avoid and how to manage possible adverse outcomes. While it is important to learn the technique, or otherwise the service can not be performed, we feel as if it is equally important to be knowledgeable about the procedure.

*" I have enjoyed teaching students for over 5 years now. The 5 week classes are amazing. I love to meet with my students . I am a very interpersonal person and enjoy engaging with my students. I practice patience with all of my students. I was once a student I just provide the support that I know will be needed when starting.
~Kay Francis~*

Meet Your Instructor

Our course is taught by an Experienced Clinical Health Care Provider. Kay discovered the new highly trending method of Body Sculpting she began to research the most experienced and best cosmetic professional who provided training. DEVICE IS INCLUDED

Live Model Practicals

In our five week program We do offer Live Model Training. We REQUEST that all students bring their own models. The procedure is supervised by a licensed Instructor . If students are unable to bring their own model , for the live practical, a model can be provided for an additional cost of \$100. (* Rates may vary) If students REQUEST a model please allow 5 business days to arrange and schedule a model for ALL student practicals.

Clinical supervision is a formal process of professional support for students whom are currently enrolled and will be obtaining their certification in Body Sculpting. Hands on Experience aims to help students to develop in both their professional competence and confidence thereby ensuring safety, proper sterilization and appropriate application when performing a Body Sculpting procedure.

Live Model Practicals

Our practical exams or hands-on experience are designed to make sure that **students are** ready to perform the procedure properly . Students will perform the procedure that will and must be under the supervision of an Instructor and licensed technician .

What exactly **do students do** in **practical's** ?

The answer is that they put into practice everything they've learned in class and in the simulation lab which consists of practicing first, machine operation,treatment areas, machine settings, machine directions and machine placement
