Choosing a commercial dive company can be a big risk...

Most companies and municipalities have concerns with projects requiring commercial divers; minimizing their downtime, maximizing their budgets, and ensuring the work is completed efficiently with successful results.

To accomplish that, you need a top-quality dive team with sound knowledge and experience at a realistic budget, and within your time constraints.

We successfully help companies and municipalities in western Canada with:

-  Dive Inspection
-  Maintenance
-  Infrastructure
-  Construction
-  Technical Services and more

We ensure that you will return to operations quickly, confidently, and within budget.

Civil Dive Operations And Marine Services

Whether you have an intake to inspect, a pipeline to install, or a reservoir to clean; True Depth Diving & Marine Services can deliver. We give you an experienced team of dive specialists with a solid understanding of the equipment, techniques, problem-solving, and systems required to deliver the service successfully.

We have the equipment. Because every job or project is unique; the equipment requirements will also vary. We have what it takes:

- Dive Boats
- ROV Service
- Barges
- Jet Boats and Support Boats
- Dredges
- Lift Bags
- Cranes
- Backhoes and Excavators
- Underwater Cutting & Welding
- Dewatering Pumps

ROV Service (Remotely Operated Vehicle)

Our ROV division uses Canadian-Made ROV's. Compact with sealed on-board battery power; the ROV provides a clear look beneath the surface of the water, and fits into the tightest of hatches and tallest of water towers.

Our DTS340S Pipe Crawler tackles the toughest of inspections. With 1200 feet of tether, a fully submersible body, and 4-wheel drive skid steer capability we inspect pipes and structures with precision.

Contamination Diving

We do the dirty work for you. Whether it's sewage containment lagoons, or pulp settling ponds — we've got you covered.

Our containment diving equipment is only used for contaminated diving. We thoroughly disinfect our equipment after every dive we make.

Potable Water Diving

With years of experience in potable water maintenance, cleaning, and inspections; we make the process simple, efficient, and economical.

We use our potable water designated gear and equipment that has been disinfected according to the AWWA Standards — using sodium hypochlorite.

We are AWWA Compliant; we offer live video and audio inspection feed; preventative maintenance plans; dechlorinators, as well as detailed reporting for peace of mind.

Other Services Available at True Depth Diving & Marine

At True Depth Diving & Marine Services we want you to know that there isn't a job that's too big for us to tackle. With a DCBC Certified dive team; we're qualified to serve all your underwater needs - efficiently and economically.

We Also Provide:

- Valve inspection, repair, and replacement.
- Pipe plug installation, monitoring, and removal.
- Underwater concrete repair, and construction.
- Sediment removal and disposal, and more.

Our True Depth Framework is founded on Experience, Process, Knowledge, Technology, and Safety. It enables you to save downtime and money, overcome risks, and avoid costly mistakes. We make the process simple and hassle-free, just as it should be.
