

A RELIABLE PARTNER TO GEORGIA'S COUNTIES

Congratulations to Georgia's Newly Elected County Officials!

At Georgia Transmission, we extend our heartfelt congratulations to all newly elected leaders across the state. We commend your dedication to serving your community and helping Georgia thrive. As you transition into your new role, our team at Georgia Transmission is here to keep you informed about our electric reliability projects in your community and answer any questions you may have.

As a not-for-profit, transmission-only electric cooperative owned by 38 of the state's electric membership corporations (EMCs), Georgia Transmission plans, builds, and maintains high-voltage power lines and substations to help keep the lights on across the state. Working alongside our member EMCs, we help deliver electricity to more than 4.5 million Georgians. We partner with local governments across Georgia, working behind the scenes to ensure your local EMC receives reliable electricity to power homes, businesses, farms, and industries year-round.

A Reliable Partner to Georgia's Counties

Georgia's energy needs are constantly evolving, and at Georgia Transmission, we are actively investing in new projects and innovative strategies to help support the growing energy demands of our state.

Through our [Gridovation](#) initiative, we are modernizing and expanding the state's electric grid to prepare for future demands. This effort includes rebuilding aging infrastructure, implementing advanced technologies like battery storage and microgrids, and investing in grid control systems to enhance reliability and efficiency. Our goal is simple: to ensure that our member EMCs can provide Georgians with access to reliable, cost-effective electricity - now and in the years to come.

Gridovation is about more than infrastructure—it's about supporting the quality of life in the communities that our EMCs serve. As both Georgia's population and opportunities for new industries grow, the need for dependable power has never been greater. With a projected 15% increase in electric load over the next decade, our team at Georgia Transmission will continue to make strides every day to ensure that counties across the state remain competitive and resilient in the face of energy demand growth.

Your Trusted Resource

As you settle into your new role, we want to be a trusted resource for you. Whether you have questions about ongoing transmission projects, want to discuss plans for future growth, or need assistance addressing energy-related challenges in your county, our team is just a phone call or email away.

Building a new transmission line or substation means becoming a permanent part of your community. That's why we take our responsibility of being a good neighbor seriously, and why you'll hear from us directly about each new project being proposed for your community. We not only spend time behind the desk analyzing data; we also put boots on the ground to study environmental, historical, and cultural conditions. We gather input from the community to make a thoughtful decision about new line placement – a decision that addresses energy needs while minimizing overall impact.

Whether it's maintaining reliable electricity to support local businesses or expanding electric infrastructure to accommodate growing communities, we are here to support you and to do everything we can to help your county succeed.

Working Together for Georgia's Future

As a newly elected leader, you have the opportunity to shape the future of your community. Georgia Transmission is here to serve you. Together, we can strengthen Georgia's electric infrastructure, support economic development, and help keep the lights on in homes, farms, and businesses across our state.

If you have questions about Georgia's electric grid or ongoing transmission line projects, we encourage you to reach out to Craig Heighton, Georgia Transmission's External Affairs Director, at craig.heighton@gatransmission.com. We'll also proactively reach out if and when we have projects in your area.

Congratulations again on your election! We look forward to working with you and being a dependable partner as you lead your community toward a brighter tomorrow, and as we make strides together toward a more energy-reliable future.
