

Short Creek Sportsman's Club New Clubhouse

ADENA, OH

PROJECT OVERVIEW:

The Short Creek Sportsman's Club is constructing a new Clubhouse. The Clubhouse is approximately 7,800 square feet and has been strategically designed to support the club's growing membership.

Intended to serve as the central hub for the Club's membership, the new clubhouse will feature a spacious meeting hall for general assemblies and large gatherings, fully equipped restroom facilities, a dedicated conference room for board meetings and other private sessions, and a centralized kitchen area to service the meeting hall and lounge areas. Large exterior seating areas will encourage members of the club and their families to congregate.

PDDM Solutions was contracted to provide Architectural/ Engineering, Project Scheduling/Budget, and on-site Construction Management/ Owners Representative Services.

PROJECT SERVICES:
