The Orcas Island Garden Club will launch their annual series of programs on Wednesday, September 21, at 10:30 am, with presenter Thor Hanson, an award-winning author and biologist. Thor lives with his wife and son on an island in the Pacific Northwest, and we are pleased to welcome him back.

Please join us for Thor's presentation about the fraught and fascinating biology of climate change, how plants and animals all around us are moving, adapting, and even evolving in response to the climate crisis. His presentation, titled HURRICANE LIZARDS AND PLASTIC SQUID, builds on information from his most recent book by the same title.
