

JASON ONTJES

"How to Be a Noxious Weed Warrior:
A Guide to the Identification and Management of Weeds
that Matter in the San Juans"

WEDNESDAY ~ January 18, 2023

10:00 a.m.

HYBRID: Madrona Room or via ZOOM

Jason Ontjes, the Noxious Weed Control Program Coordinator in San Juan County, will teach us how to identify the most common noxious weeds in the San Juans and why we should attempt to control them. January is the perfect time to identify and manage noxious weeds. Let's make it our New Year's resolution to stop noxious weeds from being so obnoxious!

Jason earned his master's degree from the University of Washington, where he studied restoration ecology in the College of Forest Resources. Before moving to the San Juans in 2010, he trained as a Master Gardener at the Oregon State University Master Gardeners program.

You may attend the presentation in person in the Madrona Room at Orcas Center OR you may participate via ZOOM, click [HERE](#).

Wearing a mask at the in-person meeting is not required but would be very much appreciated as we continue to be mindful of the health and safety of one another. We will not be resuming the social hour with hot drinks and snacks at this time, but hope to be able to do so in the future.
