

Clinical Guidelines: FROM THE BENCH

by Robert Marbach, BA, CDT • President, Authentic Dental Lab

AUTHENTIC DENTAL LABORATORY, INC.

MAKE YOUR ANTERIORS EMAX FOR A DIFFERENCE YOU CAN SEE!

Authentic Dental Lab has 16 years of experience producing Emax restorations. Whether you prescribe Emax Full Contour or Emax Layered remember, your patients restored anterior teeth are a walking billboard for your practice.

So why not prescribe these beautiful high end esthetic restorations for your patients.

EMAX- FULL CONTOUR

CAD/CAM designed and milled technology offering the combination of translucency, opalescence and fluoresence in a full contoured lithium disilicate ceramic.

Highlights:

- CAD/CAM designed and milled
- Extremely accurate and high strength
- Blends beautifully with adjacent dentition
- Crowns can be produced in a few hours
- Great for anteriors, veneers and 3-unit bridges second premolar forward
- RMGI adhesive or conventional cementation
- Monolithic restorations cost less

EMAX

EMAX

EMAX- LAYERED

This is where CAD/CAM technology unites with high-performance laboratory technology. This unique biocompatible lithium disilicate ceramic is milled to full contour and then cut-back incisally and facially. Special ceramics are then layered to achieve predictible highly personalized natural-looking restorations even for the most complex esthetic cases.

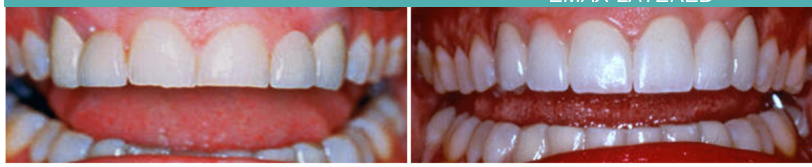

Highlights:

- This special layering process achieves the most natural looking esthetics today
- CAD/CAM designed and milled for accurate fit and strength
- Predictable shade results with excellent light transmission
- Great for anteriors, veneers and 3-unit bridges second premolar forward
- RMGI adhesive or conventional cementation
