Emerald Carpets Introduces Infinity: The Next Generation of Trade Show Flooring

Emerald Carpets, a leading innovator in the trade show, exhibitions, and special events industry, proudly announces the debut of Infinity, an entirely new carpet line engineered using groundbreaking ExpoMax™ technology. This cutting-edge, cradle-to-cradle recyclable product is poised to revolutionize event flooring, setting an unparalleled standard for sustainability, durability, and efficiency.

Available in 40 colors, this new plush style carpet can be returned to Emerald Carpets to be recycled 100% into future products for the exhibition industry.

Unmatched Sustainability Infinity is 100% recyclable thanks to ExpoMax™ technology, eliminating raw materials that previously hindered recyclability. This strategic design not only reduces waste but also significantly lowers carbon emissions through every aspect of production and shipping. In fact, the entire manufacturing process for Infinity uses zero water, while simultaneously minimizing energy consumption—all without compromising performance.

As sustainability becomes an ever more pressing priority, Infinity raises the bar by proving that environmental responsibility and superior performance can coexist. It’s a transformational product that promises to change the face of the tradeshow industry, one reusable installation at a time.

"For us, sustainability isn’t just a goal—it's a principle that guides every action we take. From design to disposal, Emerald Carpets is dedicated to delivering products that balance the needs of today with the preservation of tomorrow."

A New Era for the Trade Show Industry As the only vertically integrated carpet manufacturer designing and producing products specifically for the trade show market, Emerald Carpets proudly leads the charge toward a greener, more efficient future. Infinity, powered by ExpoMax™ technology, is more than just a product launch—it’s a pivotal shift for the industry, paving the way for event flooring that combines unmatched sustainability, cost-effectiveness, and ease of use.

For more information on Infinity or ExpoMax™ technology, please contact our press team at Emerald Carpets or visit our website at **Emerald Carpets | Trade Show Carpet Specialists**.
