

LINUX SYSTEM ADMIN. IN ARLINGTON, VA

Title: System Admin

Location: Crystal City, VA

Work Authorization: Active Top Secret SSBI

Seeking a Systems Administrator to work on a small, dynamic team, focused in a collaborative environment. The individual will be responsible for the configuration, security, and operation of a small number of established virtual computer systems, and ensuring the managed systems meet the needs of users.

Responsibilities include monitoring systems and maintaining security policies; performing security scans, reviewing results, analyzing logs, and taking corrective actions; working closely with the security officer and maintaining RMF accreditation; installing, configuring, updating, tuning and supporting RHEL OS & software; supporting software developers; responding to system outages and availability issues; troubleshooting problems; providing routine automation; managing a small number of user accounts; answering technical queries; providing recommendations; assisting users; testing backups.

Qualifications:

- Top Secret SCI clearance
- BS in Computer Science or equivalent experience.
- Minimum three years' Computer System Administrator experience.
- Security+ certification.
- Proven problem solving and troubleshooting ability.
- Demonstrated experience administering Red Hat Enterprise Linux systems.
- Experience in routine automation using shell, Python, or Perl scripting.
- Experience with virtual machine operations.
