FORZA / CAPACITY + CONTROL

Total shipment cost worksheet.

Use your own records. Keep quoted charges, actual costs and estimates distinct.

Company

Origin to destination / shipment

Equipment / requirements

Pickup date / frequency

Base transportation

Record the quoted rate and what the fuel treatment includes.

Quoted rate / currency

Fuel included, separate or indexed

Accessorials

List the charges, triggers and written inclusions or exclusions.

Known or quoted extra charges

Trigger / approval / supporting evidence

Recovery or failure cost

Document actuals. Keep a possible recovery scenario separate.

Documented actual recovery cost

Illustrative scenario, if used

Internal effort

Track measurable coordination, waiting and rescheduling work.

Recorded hours / activity

Cost assumption and its basis

Comparable decision

Match the same service, product and security requirements.

What must stay in the plan?

One avoidable cost or handoff to test

Evidence, decision owner and review date

After delivery: compare the final invoice and execution with the quoted assumptions.

A lower quote is not proof of weaker service. No savings or service outcome is guaranteed.
