FORZA LOGISTICS GROUP

FORZA SHIELD™

BEFORE YOUR FREIGHT MOVES.

Know who’s moving it.

Eight connected layers. One accountable team.

MULTI-LAYER CARRIER SECURITY & FRAUD PREVENTION

Forza combines carrier intelligence, independent verification and shipment-specific controls to reduce uncertainty before release and stay connected through delivery.

01 / BEFORE DISPATCH

Carrier intelligence

Review carrier history, compliance concerns, reputation and operational risk across independent intelligence sources.

02 / BEFORE DISPATCH

Authority & insurance

Check active operating authority and cargo coverage against shipment requirements and declared value. Resolve gaps before dispatch.

03 / BEFORE DISPATCH

Identity verification

Cross-check carrier, dispatcher and contact channels against verified records so the people arranging the load belong to the approved carrier.

04 / BEFORE PICKUP

Driver & equipment

Match the driver, tractor, trailer and identifying details to the approved plan. Confirm reefer qualifications when temperature matters.

05 / BEFORE DISPATCH

Fraud screening

Investigate suspicious domains, identity mismatches, double-brokering indicators and unusual patterns using independent fraud and identity signals.

06 / BEFORE RELEASE

Pickup security

Confirm carrier assignment, driver details, pickup authorization and shipment references before the dock releases freight.

07 / THROUGH DELIVERY

In-transit visibility

Establish tracking from pickup through delivery. Review visibility gaps and exceptions, then communicate the next step.

08 / MATCHED TO THE LOAD

High-value protection

Set enhanced verification, check-ins, route and stop requirements, and escalation procedures around the shipment’s value and exposure.

VERIFY BEFORE RELEASE. STAY CONNECTED THROUGH DELIVERY.

FORZA LOGISTICS GROUP

WHAT THIS MEANS FOR YOUR FREIGHT.

Clearer checks. Earlier questions. A team that owns the next step.

Greater supply-chain security

Connect verification to the release decision, not just the booking.

Fewer avoidable disruptions

Identify authority, coverage, equipment and pickup mismatches early.

Reduced fraud exposure

Investigate suspicious contacts and inconsistencies before freight moves.

Protection matched to value

Define enhanced controls for high-value and theft-targeted freight.

More confidence at pickup

Connect the approved carrier, driver and equipment to the dock handoff.

Personal accountability

Know who owns the shipment, communicates changes and escalates issues.

THE FORZA SHIELD™ PROMISE

The right carrier. The right driver. The right equipment.

One team accountable from booking through delivery.

TECHNOLOGY SUPPORT. PEOPLE ACCOUNTABLE.

Independent intelligence and verification tools inform the review. Forza's team connects the findings to your shipment and the release decision.
