

Mitigating expenses has never been more imperative than now

Whether it's your organization, your neighbor's or your client's, with the COVID 19 crisis upon us, this is a very important time to mitigate expenses as much as possible.

We will get back to normal business in the future and we all need to be prepared for adjustments. This quick note let's you know as a Westshore Alliance member about decreasing expenses now for two purposes.

1. To mitigate the current environment
2. To operate as lean as possible once the we get back to normal business

I would like to help you cut your costs in any of these areas:

1. Telecom
2. Merchant services fees
3. Courier/shipping
4. Waste disposal

We don't sell anything, we are simply cost reduction consultants trying to help, especially at this difficult time.

There is no risk for you to have us take a look at these expenses for you. We don't charge any fees upfront, as we just share in the savings we find for you. If we can't reduce your costs there is no charge for our services. Our mission is to help our clients maintain stability in these uncertain times without a risk of any losses.

If you would like to set a time to discuss and see if we can help you, call 813-449-1215 for an initial briefing.
