

Social Distancing in the Workplace

We know it's your first priority to protect your employees during COVID-19. Many companies have roles that must continue to report to the workplace in order to perform critical functions to keep your business operating at this time. Suddath® can help your employees practice social distancing with key tips and services designed to help keep your employees safe.

SOCIAL DISTANCING KEY TIPS:

1. Separate Employee Workstations

The CDC suggests you stay at least 6 feet away from anyone who appears sick to minimize the risk of getting the coronavirus. Rearranging workstations to meet these guidelines before someone shows symptoms may help reduce risk.

2. Relocate Employees to Unoccupied Space

If some employees are able to work from home, that may leave empty workstations throughout your building or on different floors to give employees more distance.

3. Move Essential Equipment to Open Areas

In order to have less people in confined spaces, you can move essential equipment, including printers and break room equipment to open areas.

Suddath is here to help you execute these quickly and efficiently to keep your employees safe and your business running smoothly.

WHAT WE CAN DO TO HELP

- Space planning to spread out workforce
- Relocate employee workstations within the office
- IT disconnects and reconnects
- Help relocate employees to home offices
