

TOWARDS BELONGING

JMIS Film series with food and conversation

presents:

SCIENCE FAIR

Follow nine high school students in this "immensely likeable film" as they navigate rivalries, setbacks -- and of course, hormones at -- The International Science and Engineering Fair. This "brilliant" film offers a front-row seat to these students' victories, defeats, and motivations as they work to change their lives, and the world, through science!

RSVP please via QR code or here:
